

Fidelity Stock Plan Services — Supplemental Information (2025)

Participant: Veronica Geller Plan: Pemberton Global Inc. Equity Plan (RSU + ESPP)

The cost basis reported to the IRS on Form 1099-B for shares acquired through equity compensation does NOT include the ordinary income already (or required to be) reported as wages. Use the ADJUSTED basis below on Form 8949 (code B) to avoid being taxed twice.

Sold Lots — Adjusted Basis Detail

Lot	Proceeds	Broker basis	Comp income	Adjusted basis	Term
320 sh PGLB (RSU)	52,000.00	31,000.00	18,000.00	49,000.00	LT
50 sh PGLB (ESPP)	6,750.00	5,000.00	1,000.00	6,000.00	ST
Totals	58,750.00	36,000.00	19,000.00	55,000.00	

RSU lot: correct long-term gain = proceeds 52,000.00 – adjusted basis 49,000.00 = 3,000.00. Using the broker-reported 31,000.00 would overstate the gain by 18,000.00.

ESPP Disqualifying Disposition — Detail

Item	Amount
Shares	50
Purchase date	06/30/2025
Purchase price / share (15% discount plan)	100.00
FMV at purchase / share	120.00
Sale date	12/05/2025
Sale price / share	135.00
Sale proceeds	6,750.00
Broker-reported basis (purchase cost only)	5,000.00
Ordinary (compensation) income = (FMV – purchase price) x shares	1,000.00
Adjusted basis = broker basis + ordinary income	6,000.00
Short-term capital gain = proceeds – adjusted basis	750.00

This is a DISQUALIFYING disposition: the shares were sold less than one year after purchase and less than two years after the offering date. The 1,000.00 of ordinary (compensation) income was NOT included on your 2025 Form W-2 and must be self-reported as wages on Form 1040 line 1h. That same 1,000.00 is added to the broker basis to give the 6,000.00 adjusted basis, so the remaining 750.00 is a short-term capital gain. Failing to add the ordinary income on line 1h understates your wages; failing to adjust the basis would double-tax it.

RSU Vesting Calendar (2025) — ties to W-2 Box 14

RSUs vest on schedule; the fair market value at vest is wage income (W-2 Boxes 1/3/5, listed in Box 14). Total RSU income \$70,000 matches the Pemberton W-2 Box 14 'RSU' amount.

Vest date	Shares vested	FMV/share	Vest value	Shares withheld	Net shares
08/15/2025	260	153.85	40,000.00	92	168
11/15/2025	200	150.00	30,000.00	70	130
Total	460	—	70,000.00	162	298

Shares were withheld (sell-to-cover) at vest to fund withholding, already included in W-2 Box 2. Only shares you LATER sold appear on the 1099-B.

ESPP Offering & Purchase History

Offering period	Contributions	Purchase price	FMV at purchase	Shares	Discount (comp
01/01/2025 – 06/30/2025	5,000.00	100.00	120.00	50	1,000.00

The 50 ESPP shares were sold on 12/05/2025 (disqualifying disposition). The 1,000.00 discount is compensation income reported on Form 1040 line 1h (not on the W-2).

Remaining (Unsold) Equity Holdings — Year End

Symbol	Source	Shares held	Cost basis	Year-end price	Market value
PGLB	RSU (net of sales)	320	30,400.00	121.75	38,960.00

These remaining shares are unsold and not on the 2025 1099-B; their basis matters only when sold later. This position also appears on your brokerage statement.

Methodology & Form 8949 Instructions

RSUs: the FMV at vest is wages on your W-2 and is your cost basis; brokers frequently report a lower basis. ESPP (qualified §423 plan): in a disqualifying disposition, ordinary income equals FMV-at-purchase minus purchase price and is reported as wages; add it to the broker basis. Enter each equity-comp lot on Form 8949 with code B and the basis adjustment in column (g) so previously-taxed (or self-reported) wage income is not taxed again as capital gain.
