CONCENTRATION ALERT: PNCL represents 40.3% of the account — above a 40% single-name threshold — and is your former employer (the same company whose RSUs/ESPP generated much of your wage income). Both your human capital and investment capital are concentrated in one firm that just executed a layoff. Trimming PNCL would realize long-term gain (lot cost \$29,640.00 vs. market \$46,170.00), taxed at the preferential LTCG rate plus the 3.8% NIIT given your income.
