Minimum Payment Warning & Payoff Scenarios

At your 26.99% APR, interest accrues at about \$51.73 per month on the current \$2,300.00 balance. Your fixed \$46.00 autopay is LESS than that monthly interest, so paying only the autopay would not reduce your balance — it would slowly grow. Paying more each month clears the debt and saves interest, as shown below.

Monthly payment	Months to pay off	Total interest paid	Total paid
\$46.00 (autopay only)	Never (balance grows)	—	—
\$100.00	33 months	\$974.93	\$3,274.93
\$150.00	20 months	\$552.17	\$2,852.17
\$250.00	11 months	\$306.45	\$2,606.45
\$400.00	7 months	\$191.32	\$2,491.32
Pay in full now	\$2,300.00 once	\$0.00	\$2,300.00

Targeting your highest-APR balance first (the avalanche method) reduces total interest. If you also stop adding new purchases to the card, every extra dollar goes to principal.

Utilization and Your Credit

Your statement balance of \$2,300.00 against a \$3,500.00 limit is a 65.7% utilization rate. Utilization above roughly 30% can weigh on credit scores; lowering the balance relative to the limit generally helps.

Important Disclosures

How we calculate interest: average daily balance (including new purchases). Payments are applied per the Cardholder Agreement; amounts above the minimum are applied to higher-APR balances first.
