Mortgage Servicing Disclosures

This statement and Form 1098 are provided by the loan servicer. The amount in Box 1 is the total mortgage interest received from the borrower during the calendar year and may be deductible as an itemized deduction subject to the limits in the Internal Revenue Code; consult your tax adviser.

Payments are applied in the order specified in the note: to outstanding interest, then principal, then escrow, then fees. Funds held in escrow are used to pay property taxes and insurance as they come due; the servicer performs an annual escrow analysis and will notify you of any change to the monthly escrow payment.

If your payment is received after the grace period stated in your note, a late charge may apply. Partial payments may be held in a suspense account until sufficient funds accumulate to make a full payment. Contact the servicer regarding payoff figures, which include per-diem interest to the payoff date.

Error Resolution and Information Requests: you may submit a written notice of error or request for information to the servicer's designated address. The servicer will acknowledge within five business days and respond within the timeframes required by applicable mortgage-servicing rules.

Mortgage Servicing Disclosures (RESPA / TILA)

1. Servicing. Your loan is serviced by the company identified on this statement. The servicer collects and applies payments, maintains the escrow account, and responds to inquiries. If servicing transfers, you will receive advance notice and a 60-day grace period during which a payment to the old servicer cannot be treated as late.
2. Escrow account. Funds collected for property taxes and hazard insurance are held in an escrow account and disbursed when those obligations come due. An annual escrow analysis determines whether a surplus or shortage exists and adjusts the monthly escrow payment accordingly. A surplus over the permitted cushion is refunded.
3. Payment application. Payments are applied to interest, then principal, then escrow, then any fees, as provided in the note. Funds insufficient for a full payment may be held in a suspense account until a full payment accumulates.
4. Mortgage interest statement (Form 1098). Box 1 reports total interest received during the calendar year; Box 10 reports real-estate taxes disbursed from escrow. Whether interest and taxes are deductible depends on your circumstances; consult a tax adviser.
5. Error resolution and information requests. You may send a written notice of error or request for information to the servicer's designated address. The servicer will acknowledge within five business days and respond within the timeframes required by the mortgage-servicing rules.
6. Late payments and credit reporting. Payments received after the grace period may incur a late charge and may be reported to credit bureaus. Contact the servicer promptly if you anticipate difficulty making a payment to discuss available options.
7. Insurance. You must maintain hazard insurance on the property. If coverage lapses, the servicer may obtain force-placed insurance, which is typically more expensive and protects only the lender's interest. Provide evidence of your own coverage to avoid force-placement.
8. Payoff. To obtain a payoff figure, contact the servicer; the payoff includes principal, accrued interest to the payoff date, and any fees, and may differ from the balance shown here.
