Accounting Method & Inventory Notes

The operation reports on the cash method of accounting. Income is recognized when constructively received and expenses when paid. Raised livestock and harvested grain are not inventoried; sales are reported on line 2 when sold. Purchased resale animals are reported on lines 1a–1c.

Real-estate and personal-property taxes on farm land and improvements are deducted on line 29. Interest on the operating line of credit and the equipment loan is deducted on line 21b; the home mortgage interest is not a farm expense and is not included here.

Depreciation on line 14 is computed on Form 4562 using MACRS for machinery, equipment, and improvements. No section 179 election or special depreciation allowance was claimed in 2025; the deduction reflects continued MACRS recovery on assets placed in service in prior years.

Material participation: the proprietor and family members materially participate in the farming activity; the activity is not subject to the passive-loss limitations.
