The schedule above lists all 360 scheduled payments. Early payments are applied mostly to interest; the portion applied to principal increases over the life of the loan.

## Loan Terms, How Interest Is Calculated, and Important Disclosures

### How your interest is calculated

Interest accrues on the unpaid principal balance using a fixed annual rate of 3.875%. Each monthly payment of \$963.99 is first applied to accrued interest, with the remainder applied to principal. Because interest is charged on the declining balance, the interest portion of each payment decreases and the principal portion increases over time.

### Escrow account

Your monthly payment includes an escrow deposit of \$396.26 that we use to pay your property taxes and homeowners insurance when due. We analyze your escrow account annually and adjust the deposit as needed; any surplus or shortage will be handled in accordance with RESPA.

### Prepayment

You may prepay all or part of the principal at any time without penalty. Additional principal payments reduce the total interest you pay and shorten the term. Indicate 'apply to principal' when making an additional payment.

### Property taxes and insurance

Real estate taxes paid from your escrow account during 2025 are reported in Box 10 of Form 1098. You are responsible for maintaining adequate hazard insurance on the property at all times.

### Tax deductibility

Mortgage interest and real estate taxes may be deductible if you itemize deductions on Schedule A. The deductibility of mortgage interest is subject to the acquisition-debt limits in Pub. 936, and the deduction for state and local taxes (including property taxes) is subject to an annual limitation. Consult your tax advisor; this statement is not tax advice.

### Contact and error resolution

For questions about your loan or to report an error, contact us at (505) 555-0181 or write to Rio Grande Mortgage Servicing, Attn: Customer Service, P.O. Box 7720, Albuquerque, NM 87194.
