

On-Chain Wallet Activity Report

ChainLedger — Self-Custody Wallet Transaction History & Holdings

Wallet owner (label)	Dmitri Volkov-Hayes
Wallet address	0x7Ac9F2bb1E4d5a8C03e1B6F90d2c47aE5fD3149b
Primary network	Ethereum (EVM)
Report period	October 5, 2024 – December 31, 2025
Total transactions indexed	213
Report generated	February 18, 2026
Data sources	Public blockchain explorers (Etherscan-class indexers)

Activity Summary

Total indexed transactions	213
Approvals / contract calls (no asset movement)	89
Failed / reverted transactions	45
Dust / spam receipts (no established market value)	23
Inbound transfers with value	2
Token swaps (DEX)	1
Airdrops / claims received with value	1
Total network fees paid (USD, approx.)	\$727.46

This report lists raw on-chain activity for the wallet above as indexed from public blockchain data. U.S. dollar values are estimated at the time of each transaction using third-party price feeds. ChainLedger does not classify transactions for tax purposes and does not determine which events are taxable; review each event and consult a tax professional. Dust and spam tokens with no established market are shown at \$0.00.

Current Wallet Holdings — December 31, 2025

Token	Units	Est. price	Cost basis (info)	Est. value
ARBX	5,000	\$0.00	\$1,200.00	\$20.00
ETH	0.44	\$1,650.00	\$800.00	\$726.00
Dust tokens (no market)	various	\$0.00	\$0.00	\$0.00
Total wallet value				\$746.00

The ETH position originated from an on-chain token swap during 2025; the ARBX position originated from a token distribution claimed during 2025 (see the transaction ledger). Cost basis shown is ChainLedger's estimate and may be incomplete for assets received on-chain.

Networks & Contract Interactions

Networks	
Ethereum mainnet	Primary — all indexed activity
Layer-2 / sidechains	None detected for this address
Wallet type	Self-custody (EOA); keys controlled by owner
Hardware wallet link	Detected self-transfers to a cold-storage address

Report generated 2026-02-18 · Source: public blockchain explorers

Most-Interacted Counterparties / Contracts

Counterparty / contract (label or address)	Interactions
mint contract	27
Ledger cold wallet	26
spam contract	23
claim contract	23
Coinhaven Hot Wallet	1
0x599d0c6dc0e1	1
0xfc2ae80916f3	1
0x1ff89ae97be9	1
0x87a6b8d7c31e	1
0xe91a21142c7d	1
0xe56224b625ab	1
0x27ad775f2f22	1

Complete On-Chain Transaction Ledger

All indexed transactions in chronological order. 'Asset / Δ' shows the net token movement; a value of '—' or '±0' indicates no net asset transfer (for example, a token approval, a self-transfer, or a reverted transaction). USD value is estimated at transaction time; network fee is the gas paid.

Note: A token approval grants a contract permission to move a token and does not itself transfer any asset. Reverted transactions did not execute but still incurred a network fee. Dust receipts are unsolicited and have no established market value.

Inbound Events (Receipts)

All transactions that increased a token balance, including transfers in, airdrops/claims, dust, and NFT mints. Review each to determine its character.

Date	Type	Token	Amount in	USD value at receipt

Outbound & Swap Events

Transactions that decreased a token balance or exchanged one token for another.

Report generated 2026-02-18 · Source: public blockchain explorers

Date	Type	Token	Movement	USD value
2025-07-15	Swap	FROGE → ETH	-1,000,000 / +0.4444	\$800.00

Network Fee (Gas) Summary

Month	Network fees (USD, approx.)
2024-10	\$47.40
2024-11	\$43.45
2024-12	\$56.90
2025-01	\$63.93
2025-02	\$78.44
2025-03	\$45.84
2025-04	\$31.82
2025-05	\$22.17
2025-06	\$49.05
2025-07	\$57.26
2025-08	\$45.43
2025-09	\$100.80
2025-10	\$27.39
2025-11	\$33.28
2025-12	\$24.30
Total network fees	\$727.46

Network fees are paid in ETH and shown here converted to U.S. dollars at the time incurred. Fees on personal wallet transfers are generally not separately deductible for individuals.

Token Approval Register

Approvals grant a smart contract permission to move a token on your behalf. Outstanding approvals are a common security risk; review and revoke unused approvals. An approval transfers no asset by itself.

Date	Token	Approved spender (contract)	Method	Block	Net fee
2024-10-10	UNI	0x1d200b8682c6	approve	20921159	\$1.86

Per-Token Activity Summary

Count of indexed events by token and the wallet's end-of-period position. Use with the ledger to review the character of each token's inbound and outbound events.

Token	Receipts	Sends/Swaps	Approvals	Other	Held value (12/31)
ETH	0	0	6	72	\$726.00

Data Methodology

Indexing.

Transactions are read from public blockchain explorers for the wallet address shown. Internal contract calls and token transfers are reconstructed from event logs.

Valuation.

U.S. dollar values are estimated using third-party historical price feeds at the block timestamp of each transaction. Illiquid or unlisted tokens may show \$0.00 where no reliable market price exists.

Dust and spam.

Unsolicited tokens sent to the wallet are flagged as dust and valued at \$0.00. Interacting with unknown dust tokens can be unsafe; ChainLedger does not recommend doing so.

Completeness.

On-chain data reflects only activity recorded on the blockchain for this address. Activity on centralized exchanges or other wallets is not included in this report.

Cost basis.

Where an asset was received on-chain (for example, via a swap or a claim), ChainLedger estimates cost basis from the transaction's value at receipt; this estimate may be incomplete.

Glossary

Term	Meaning
EOA	Externally owned account — a standard self-custody wallet controlled by a private key.
Approval	A transaction granting a smart contract permission to spend a token; moves no asset itself.
Swap	Exchange of one token for another, typically via a decentralized exchange router.
Airdrop	Tokens distributed to wallets, sometimes requiring a claim transaction.
Dust	Tiny or spam token amounts sent unsolicited; often valueless or malicious.
Gas / network fee	The fee paid to process a transaction on the network.
Reverted	A transaction that failed to execute; no state change other than the fee paid.
Cold wallet	An offline hardware wallet used for secure self-custody.

Disclaimers

ChainLedger provides on-chain data aggregation for informational purposes only and does not provide tax, legal, or investment advice. This report does not determine the tax character of any transaction.

U.S. dollar values are estimates and may differ from values realized. Blockchain data may be incomplete or delayed. You are responsible for verifying this information against your own records and for any tax reporting obligations. Consult a qualified tax professional regarding the treatment of your on-chain activity.
